Short biography

Ahmed CHEMORI

LIRMM, University of Montpellier, CNRS, France

Ahmed CHEMORI received his M.Sc. and Ph.D. degrees in Automatic Control from the Polytechnic Institute of Grenoble, France, in 2001 and 2005, respectively. From 2004 to 2005, he was a Research and Teaching Assistant at the LSS Laboratory, University Paris 11. He subsequently joined Gipsa-Lab as a CNRS Postdoctoral Researcher. He is currently a Senior CNRS Researcher in Automatic Control and Robotics at the CNRS, affiliated with the LIRMM laboratory. His research interests focus on nonlinear control, including adaptive, robust, and predictive control, with applications to various fields of robotics, particularly wearable, parallel, and marine robotics. He has authored or co-authored more than 200 scientific publications, including journal articles, patents, books, book chapters, and conference papers. He has co-supervised 28 Ph.D. theses, 21 of which have been successfully defended, as well as more than 40 M.Sc. theses. He currently leads the Marine Robotics Team and chairs the LIRMM Valorization Committee. He serves as Technical Editor for IEEE/ASME Transactions on Mechatronics and has been Guest Editor for several special issues. He is an IEEE Senior Member and an IFAC Technical Committee member of TC1.2 (Adaptive and Learning Systems), TC4.2 (Mechatronic Systems), TC4.3 (Robotics), and TC7.2 (Marine Systems). He has also served as a Technical Program Committee/International Program Committee member and Associate Editor for numerous international conferences, including IEEE IROS, IEEE RO-MAN, IFAC ALCOS, IFAC CAMS, and the IFAC World Congress, and has organized several international scientific events.
